About Frama	4-5
About St. Pauls Apothecary	6-9
Product overview	50-95

Since the launch of our first collection in 2011, Frama has embraced an organic and collaborative approach to design; an approach that is equally inspired by the old and the new, by digital technologies and analogue traditions. Frama's naturalistic, hands-on approach to design and production has allowed the brand to create a unified aesthetic across a growing range of product collections, including: furniture, lighting, home objects, fabrics, apothecary, books, and kitchens.

Based in Copenhagen's Nyboder neighbourhood, Frama's headquarters is an ever-evolving studio and shop space housed in the historic St. Pauls Apotek (established in 1878). Each year, the Frama Studio Store hosts a full calendar of open events, collaborative gatherings, as well as art and design installations.

FRAMA

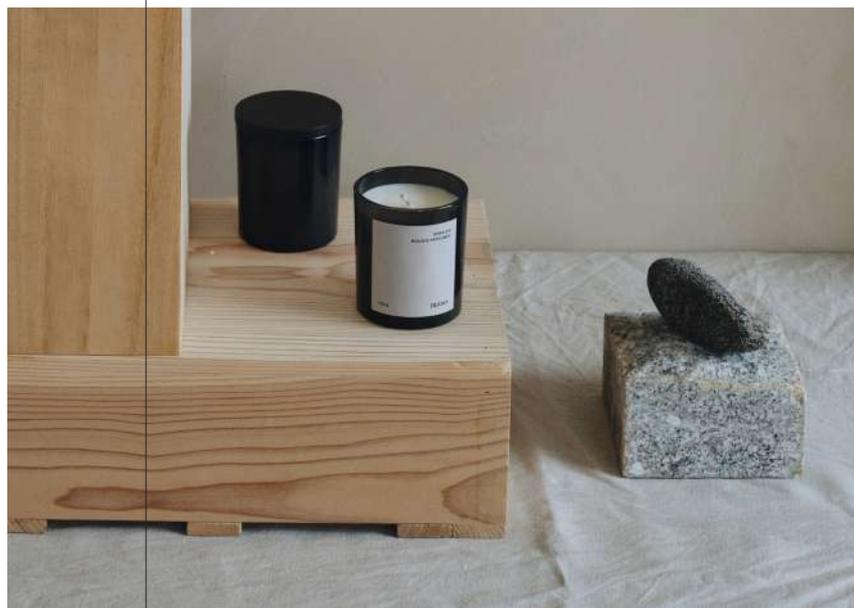

*"One of the very magical things
about scents, is that each one
evokes very individual memories"*

Niels Strøyer Christophersen

Every product in the St. Pauls Apothecary Collection has been developed in Copenhagen and is created with natural, hand picked ingredients sourced from some of the most trusted suppliers in the world. Each product in the collection is gender neutral and is crafted with quality-tested essential oils that offer a pure, refreshing, and distinct scent that helps restore balance for the skin and the senses. Bottled in custom-colored Italian glass, each item in the St. Pauls Apothecary Collection aims to not only invigorate the senses, but to also bring a quality of object permanence into spaces.

The St. Pauls Apothecary Collection is a line of skin care and scent products by Frama, an independent Danish creative studio. Introduced in 2016, the Apothecary Collection is inspired by St. Pauls Apotek - a historic, wood lined pharmacy in central Copenhagen first established in 1878. Located in the iconic neighborhood of Nyboder, the St. Pauls Apotek is now home to Frama's creative studio space, a modern design laboratory for

testing materials, ingredients, and ideas. At its core, Frama defines their work as a dialogue between opposites, a linking of the classical and the contemporary, a conversation between digital and analogue. And just as the physical space of St. Pauls Apotek has become a symbol of this aesthetic dialogue, so too is the St. Pauls Apothecary Collection both a nod to the past and a reflection of this present day synergy.

Made in Italy

Made from high-quality essential oils, the St. Pauls Apothecary Body Fragrances are subtle, gender-neutral scents inspired by travel, nature, and the journey of discovery. The carefully-crafted scent profile of each product in the collection is tied to a specific physical place, a place with a unique character and history, whether that is the ancient pine forests of Korea or the historic, fir-paneled St. Pauls pharmacy in Copenhagen. All Body Fragrances are made in Italy and are suitable for all skin types.

「1917」は、デンマークの都市 オーフス (Aarhus) にある1917年設立のミュージアム「Kunsthal Aarhus」とのコラボレーションで生まれた香り。古典的な「シブレー (Chypre)」の香りの現代的な解釈です。シブレーは、オークモス、パチュリ、ベルガモットなどを主体とする香りの系統で、紀元前から香油を生産していたとされる地中海のCyprus (キプロス島) が由来。オーフスは海に面した産業と文化の中心都市。FRAMA はローズ、ライラック、海藻の香りを重ねて、緑鮮やかな夏のオーフスの香りとして現代のシブレーを表現しています。

FROM SOIL TO FORM

Created in collaboration with the Seoul-based creative studio 'Be My Guest,' From Soil to Form is a wholly natural, uniquely sculptural room diffuser. Combining three distinctly aromatic natural materials—Korean Pine, baked soil spheres, and fragrant essential oils—this handcrafted objet d'art creates a pleasant and calming effect for any interior space. Each From Soil to Form set includes nine spheres that have been handmade from clay-rich soil sourced from Korea, where they were then fired in a traditional kiln using a time-honored method. When fragrant oil is applied to the hardened spheres, the natural properties of the soil allow a subtle scent to be diffused into the air while, at the same, helping to balance the humidity of a room. If properly cared for, the spheres can be used indefinitely, providing years of practical use and enjoyment. From Soil to Form is made of 100% natural materials and is fully biodegradable.

SNUFFER

A candle snuffer is a charming objet nostalgique, a simple but romantic tool that evokes an age when the warm glow of candlelight nightly filled the world's homes, offices, and shops. The new St. Pauls Apothecary Candle Snuffer from Frama is a practical, modern interpretation of the classic tool, designed for use in the 21st century home. Made from delicate but durable stainless steel, the look and feel of the Candle Snuffer will evolve with time, as it develops a graceful patina with use and age.

Please note: always light and extinguish candles with care. To avoid excess smoke, hold the Snuffer over the candle flame for 5 - 10 seconds, then allow the candle to cool fully (approximately 10 minutes) before covering the candle with lid, moving, or handling. Always keep candles out of the reach of children.
